Experiment - 14

Write a code using Raw Sockets to implement Packet Sniffing

5/10/26

Aim :

To implement Packet Sniffing using raw Sockets.

```
from scapy.all import sniff
from scapy.layers.inet import IP, TCP, UDP, ICMP

def packet_callback(packet):
    if IP in packet:
        ip_layer = packet[IP]
        protocol = ip_layer.proto
        src_ip = ip_layer.src
        dst_ip = ip_layer.dst
        protocol_name = ""
        if protocol == 1:
            protocol_name = "ICMP"
        elif protocol == 6:
            protocol_name = "TCP"
        elif protocol == 17:
            protocol_name = "UDP"
        else
            protocol_name = "Unknown Protocol"
```

print(f"Protocol : {protocol_name}")

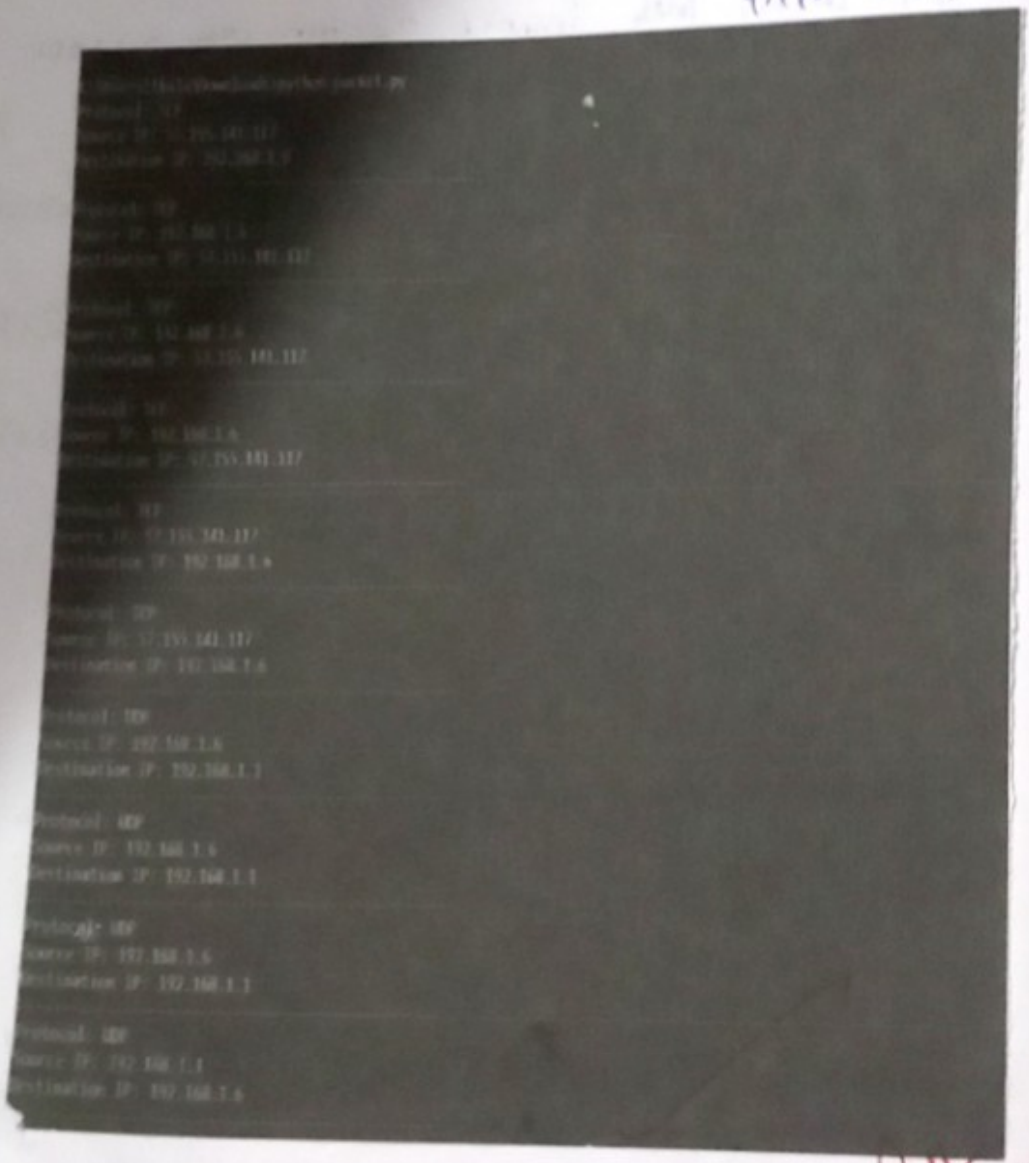

print(f"Source IP : {src_ip}")

print(f"Destination IP : {dst_ip}")

print("-", 50)

sniff(iface = "wifi", prn = packet_callback,

filter = "ip", store=0

Result :

Thus packet sniffing was implemented.
