Experiments on packet capture tool : Wireshark

Aim:

To experiment on packet capture tool

Wireshark :

Wireshark a network analysis tool formely known as ethereal. Captures packets in real time display them in human-readable format. Wireshark includes filters, color coding. other features that let you dig into network traffic, inpect individual packets.

-> Capture network traffic
-> watch Small Statistics
-> Define filters Capture, display

Capturing and Analyzing packets using wireshark tool.

To captue, filter, view packets in Wireshark tool.

Capture 100 packets from ethernet and save it

Procedure:

* Select Local Area Connection in wireshark
* Go to capture Option

* Select Stop Capture automatically after 100 packets

* Then Click Start Capture

* Save the packets.

Create a filter to display TCP / UPP analysis

Procedure: * Select LAN connection in wireshark

* Go to capture option

* Select Stop Capture automatically

* Search TCP packets in Search bar

* To see flow graph click Statistics

* Save the packets

Create a filter to display ARP Packets

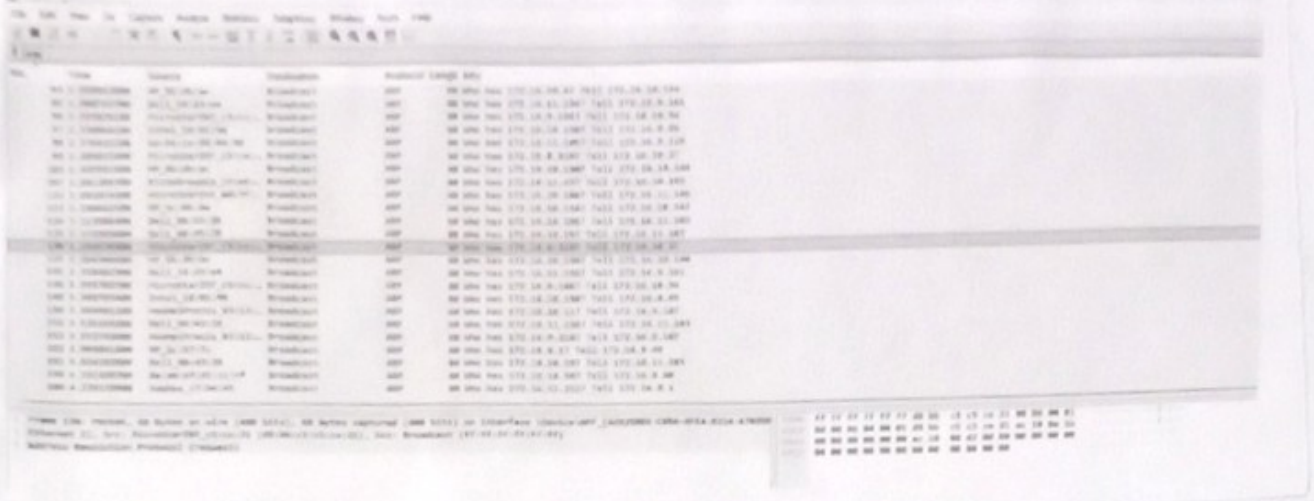

* Go to capture option

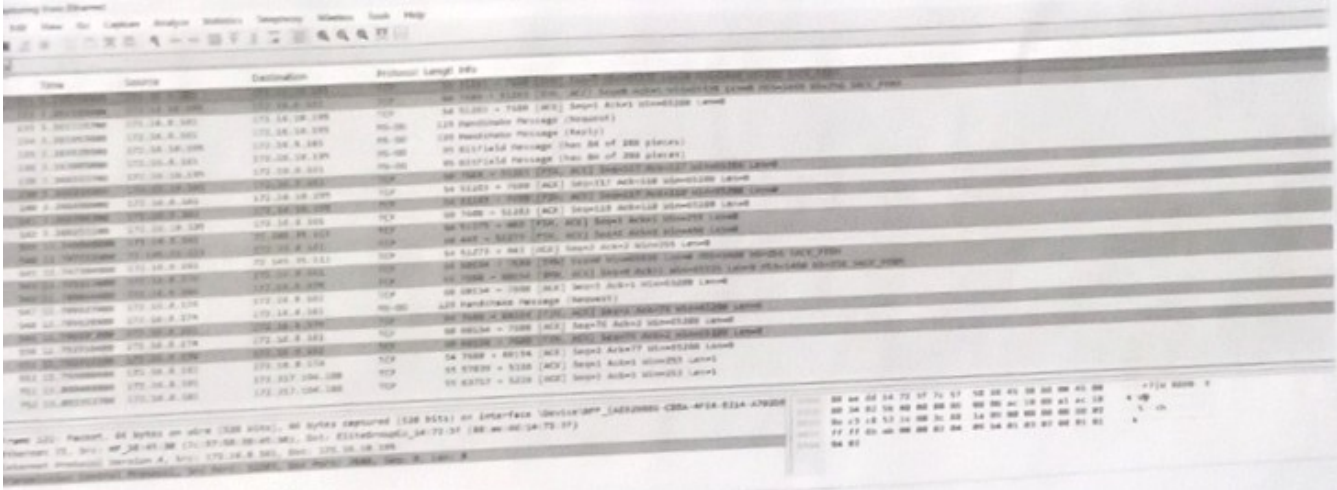

* Select Capture automatically after 100

* Then click Start Capture

* Search ARP packets in Search bar

* Save the packets.

Result:

Therefore experiment on packet Capture tool using wireshark has been executed successfully.
